

Samuel Tanaka Sibarani

Applying for: Cybersecurity Intern

☎ (+62) 812 8202 8269 | ✉ sammtan.rt@gmail.com | 📄 sammtan | 🌐 sammtan.github.io | 📍 Jakarta, ID (Remote Available)

Professional Summary

Cybersecurity-focused Computer Engineering student with hands-on experience in network security, threat detection, and enterprise security architecture. Developed production-ready security platforms including an enterprise cyber range and AI-powered fraud detection system. Seeking a cybersecurity internship to apply advanced security knowledge and contribute to organizational defense strategies.

Education

Universitas Indonesia

Jakarta, ID

B.Eng. in Computer Engineering

09/2022 - 09/2026

Relevant Coursework: Computer Networks, Operating Systems, Database Security, Cryptography

Key Projects

NetLab V2 - Enterprise Cyber Range Platform

Lead Developer | 2025

- Designed and implemented enterprise-grade cybersecurity training platform with dual-container architecture
- Created 17-VM enterprise topology with DMZ, Corporate, and Security VLANs for realistic threat simulation
- Developed web-based management dashboard with real-time network monitoring and VNC console access
- Built 5 specialized training scenarios: SOC training, penetration testing, IoT security, and incident response

Technologies: Docker, QEMU/KVM, Alpine Linux, Bridge Networking, Python, JavaScript

Banking Security Platform

Security Engineer | 2024

- Developed AI-powered fraud detection system with Isolation Forest algorithm for real-time transaction monitoring
- Implemented comprehensive security dashboard with multi-format reporting (PDF/CSV/Excel)
- Designed customizable fraud detection rules and risk assessment workflows

Technologies: Python, PySide6, SQLite, scikit-learn, ReportLab

NetGuard ML

Security Researcher | 2024

- Built network security simulator with ensemble ML models for threat detection
- Implemented advanced anomaly detection using Isolation Forest, LSTM, Random Forest, and DBSCAN
- Created pre-built attack scenarios simulating corporate breaches, IoT botnets, and APT attacks

Technologies: Python, scikit-learn, NetworkX, Matplotlib

Professional Certifications

Security Certifications

2024-2025

1 Ethical Hacker - Cisco

Cisco Networking Academy | Penetration Testing, Vulnerability Analysis, Security Assessment

2 CCNA: Enterprise Networking, Security, and Automation

Cisco Networking Academy | Network Security, Enterprise Networking, Network Automation

3 CCNA: Introduction to Networks

Cisco Networking Academy | Network Fundamentals, TCP/IP, Routing & Switching

Specialized Workshops

2024-2025

- Cybersecurity Fundamentals - Hacktrace Ranges x Spentera
- Penetration Testing Basic - Practical Security Skills Workshop
- Ghidra Reverse Engineering - Binary Analysis & Malware Research
- Wireless Hacking Lab - Wi-Fi Security & Network Penetration

Technical Skills

Security Tools: Metasploit, Burp Suite, Wireshark, Nmap, Ghidra, John the Ripper, Hashcat, ZAP

Programming: 🐍 Python, 🟢 C/C++, 🟡 JavaScript, 🐚 Bash

Security Domains: Network Security, Penetration Testing, Vulnerability Assessment, Incident Response, Digital Forensics

Infrastructure: Docker, Linux/Windows Administration, QEMU/KVM, Bridge Networking, VLAN Configuration

AI/ML Security: scikit-learn, TensorFlow, Anomaly Detection, Fraud Detection, Threat Intelligence

CVE Research & CTF Experience

Recent Security Research2024-2025

- **Billy Madison VulnHub** - Advanced packet analysis and port knocking exploitation
- **Tiki 1 VulnHub** - Web application vulnerability analysis and privilege escalation
- **DarkHole 2** - Network penetration and system compromise documentation
