

Samuel Tanaka Sibarani

Applying for: Software Development Intern

☎ (+62) 812 8202 8269 | ✉ sammtan.rt@gmail.com | 📄 sammtan | 🌐 sammtan.github.io | 📍 Jakarta, ID (Remote Available)

Professional Summary

Entry level full-stack developer with strong expertise in modern web technologies, system architecture, and database design. Proven track record building few production-ready applications including enterprise platforms and AI-powered systems. Seeking a software development internship to contribute to innovative projects and expand technical expertise in a collaborative environment.

Education

Universitas Indonesia

Jakarta, ID

B.Eng. in Computer Engineering

09/2022 - 09/2026

Software Focus: Data Structures, Algorithms, Software Engineering, Database Systems

Technical Projects

Portfolio Website - Modern Web Development

Full-Stack Developer | 2025

- Built responsive portfolio website with modern React architecture and advanced UI/UX design
- Implemented dynamic content management with server-side rendering and SEO optimization
- Created interactive components with smooth animations and mobile-first responsive design

Technologies:  Next.js,  React,  TypeScript,  Tailwind CSS

NetLab V2 - Enterprise Platform Architecture

Lead Software Architect | 2025

- Designed and implemented scalable dual-container architecture with microservices pattern
- Developed comprehensive REST API with real-time WebSocket communication
- Built interactive web dashboard with dynamic network visualization and monitoring
- Created automated deployment system with Docker containerization and orchestration

Technologies:  Docker,  Python,  JavaScript, REST APIs

Banking Security Platform - Desktop Application

Software Engineer | 2024

- Developed comprehensive desktop application with modern GUI framework and database integration
- Implemented robust data processing pipeline with pagination, filtering, and search capabilities
- Created multi-format reporting system (PDF, CSV, Excel) with custom templates and styling
- Built real-time data visualization with interactive charts and statistical analysis

Technologies:  Python, PySide6, SQLite, ReportLab

SpecialistAI System - Multi-Agent Architecture

AI Systems Developer | 2025

- Architected modular multi-agent system with intelligent task routing and load balancing
- Implemented efficient model quantization and optimization for resource-constrained deployment
- Designed clean API interfaces with comprehensive error handling and logging

Technologies:  PyTorch,  Python, Transformers, Google Colab

Technical Skills

Programming Languages

- **Primary:**  Python (Expert),  JavaScript,  TypeScript
- **Systems:**  C/C++,  C#,  Java
- **Specialized:**  CUDA,  OpenCL,  MATLAB

Frontend Development

- **Frameworks:**  React,  Next.js, Vue.js
- **Styling:**  Tailwind CSS,  SASS/SCSS, Styled Components
- **UI Libraries:** Shadcn/ui, Material-UI, Ant Design

Backend Development

- **APIs:** REST, GraphQL, WebSocket, gRPC
- **Frameworks:** FastAPI, Express.js, Django, Flask
- **Authentication:** JWT, OAuth 2.0, Session Management

Database Systems • SQL: PostgreSQL, MySQL, SQLite

- **NoSQL:**  MongoDB MongoDB (7 Certifications), Redis
- **ORM/ODM:** SQLAlchemy, Prisma, Mongoose

DevOps & Infrastructure

- **Containerization:**  Docker, Docker Compose
- **Version Control:**  Git, GitHub Actions
- **Cloud Platforms:** Experience with cloud deployment and scaling
- **Linux Administration:** Ubuntu, CentOS, Alpine Linux

Professional Certifications

Database & Development Certifications

2024-2025

1 **MongoDB Professional Developer Certification Series**

MongoDB University - 7 Specialized Certifications:

- AI-Powered Search & RAG Applications
- Advanced Schema Design & Optimization
- CRUD Operations & Performance Tuning
- Schema Design Patterns & Best Practices

2 **IBM Design Thinking Practitioner**

IBM | User Experience Design, Software Architecture, Innovation Processes

Network & Systems

3 **CCNA: Enterprise Networking**

Cisco Networking Academy | Network Programming, Infrastructure Automation

Development Experience

Software Architecture Patterns

- **Microservices:** Designed distributed systems with service mesh architecture
- **MVC/MVVM:** Implemented clean architecture patterns in multiple projects
- **Event-Driven:** Built reactive systems with message queuing and event streaming

Code Quality & Testing

- **Testing:** Unit testing, integration testing, automated test suites
- **Code Review:** Collaborative development with peer review processes
- **Documentation:** Comprehensive API documentation and technical writing

Performance Optimization

- **Frontend:** Bundle optimization, lazy loading, performance monitoring
- **Backend:** Database optimization, caching strategies, load balancing
- **Mobile:** Responsive design, progressive web apps, mobile-first development

Development Achievements

Open Source Contributions

- **Portfolio Projects:** 5 major repositories with comprehensive documentation
- **Code Quality:** Consistently clean, well-documented, and maintainable code
- **Community:** GitHub contributor with few production-ready applications

Competition Experience

- **COMPFEST 15 Indie Game Ignite** - Game Development Competition (2023)

Languages

Indonesian (Native), English (Professional Working Proficiency)

Additional Information

Available for Remote Work: Experienced with distributed team collaboration and remote development workflows

Learning Mindset: Continuously exploring new technologies including WebAssembly, serverless computing, and modern development frameworks

Development Portfolio: sammtan.github.io • Code: github.com/sammtan
